

GREENHOUSE HEATER WITH THERMOSTAT

With the option of wall mounted or floor standing operation, the ECOHEATER Greenhouse and Shed Heater with built-in thermostat is the safe and economical way to provide gentle non-directional heating and frost protection for greenhouse plants, outbuildings, sheds and work areas.

Manufactured in high quality seamless tube and supplied with wall/floor brackets and a 2m cable and plug.

- **COMPACT GREENHOUSE HEATER WITH BUILT-IN THERMOSTAT** - uses less electricity than fan heaters and is cleaner than paraffin heaters
- **SUPPLIED WITH WALL/FLOOR BRACKETS** - for wall mounted or floor standing operation
- **2 METRE PUSH-FIT BLACK CABLE AND PLUG** - which can be disconnected when the heater is not in use
- **IP44 RATED** - for water resistance
- **AUTOMATIC SAFETY CUT-OUT** - and fully CE certified and BS EN 60335/1:2002 compliant
- **AVAILABLE IN 3 SIZES** - 500mm (55W), 1000mm (120W) and 1500mm (190W)

Contents:	1 x ECOHEATER Greenhouse heater 1 x 2m black cable and plug 2 x wall/floor brackets
Colour:	Green
